KATEK Memmingen GmbH - Off-Grid monitoring system

NEW: Fernlite

The monitoring solution for Off-Grid PLI inverters

FernView portal

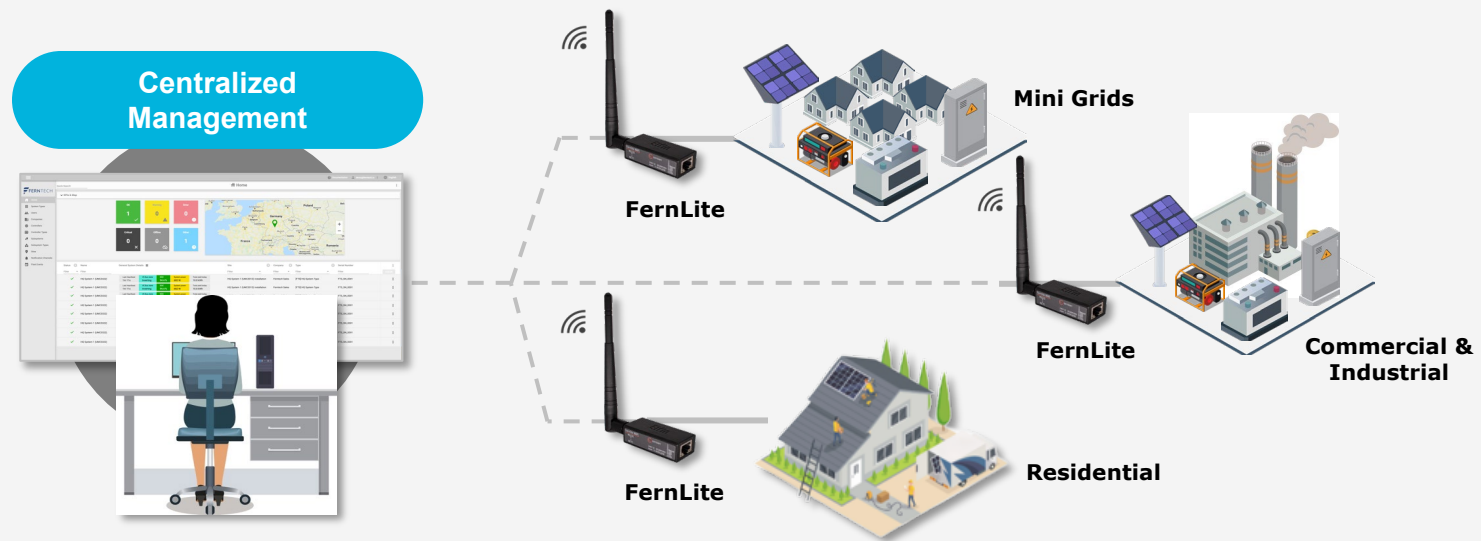

FernLite Wifi

In collaboration with

Main Benefits

Monitoring enables effective centralized operation and management of fleets of solar PV systems at scale:

Other Advantages

Aggregate

- Aggregate data across all system portfolio
- Accurate high-frequency data collection
- GSM/Wifi to cloud to one dashboard

Analyze

- Track performance
- Compare with optimal values
- Benchmark against peer assets

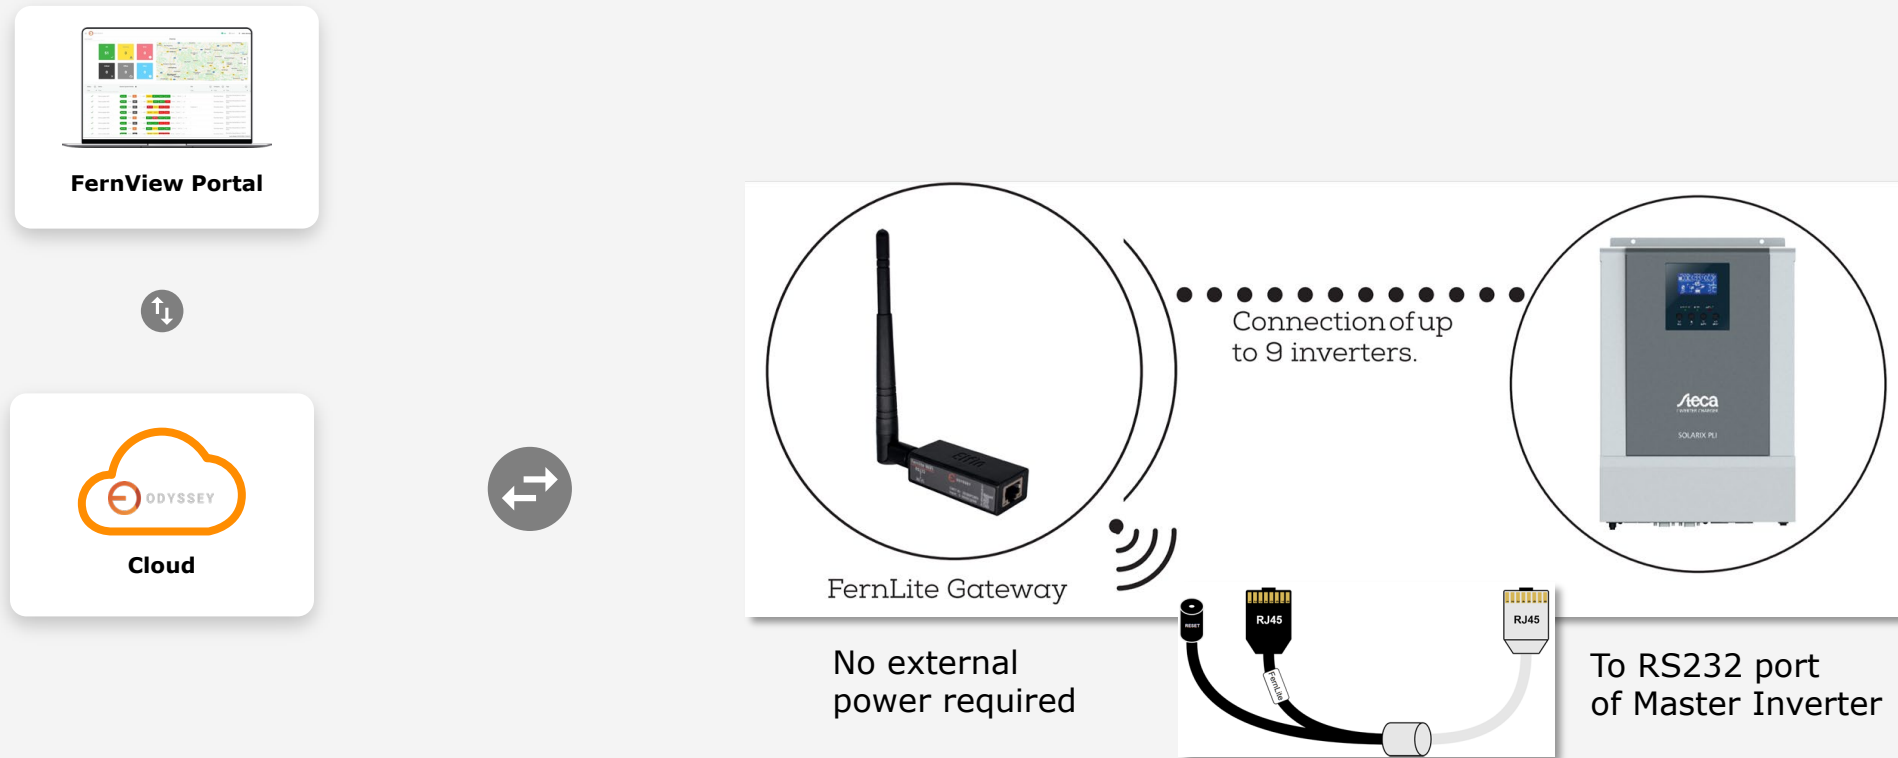

Control

- Remotely change Inverter configuration and track historical changes
- Custom alerts
- Reporting
- Troubleshooting tools

Efficiency

- Avoid trips to site
- Diagnose problems remotely
- Reduce O&M costs
- Improve design optimization
- Increase system lifespan

How does it work?

Accessories

Single packaging for each unit that will include

- FernLite Wifi IoT gateway
- WiFi Antenna
- FernLite RS232 cable (2XRJ45 + Reset button)
- Fixed holder

Note: No need for external power supply!

Monitoring System Hardware

- Low cost
- Easy installation
- External power supply not required
- No local data storage available or data compression
- Suitable for both single phase and three phases system (up to 9 inverters per system with one FernLite)
- 4G version available under request
- End to end encrypted data transfer

Main Software Features

- Intuitive status overview of all systems
- Standardized dashboard with layout diagram, Key performance indicators and charts to immediately understand how a system is performing
- Change the inverter configuration remotely
- Keep history record of all configuration changes made
- Set-up notifications via e-mail or slack when an alarm is triggered or thresholds are reached
- Export data via to csv/excel
- API integration available for third-party software
- Create an unlimited number of users and manage their rights
- Manage sub-companies to logically organize systems and users
- English, Spanish and French available
- Advanced monitoring and control features also available on request
